SUMMARY

Full-stack software engineer experienced in enterprise applications, backend systems, mobile/web products, SQL databases, AI-enabled automation, and AI-assisted development workflows. Currently building workplace technology solutions at CBRE while developing automation-focused software projects through Lynde Engineering.

SKILLS

Java, Python, JavaScript/TypeScript, React, React Native, Next.js, Node.js, FastAPI, SQL, PostgreSQL, Oracle SQL, MySQL, SQL Server, Docker, Git, CI/CD, AWS, GCP, Vercel, Railway, OCR, LLM APIs, data pipelines

EXPERIENCE

Coldwell Banker Richard Ellis (CBRE)

May 2023 - Present

Full Stack Engineer | Workplace Strategy Analyst

Chicago, IL

- Own end-to-end development of custom enterprise application features, from requirements analysis and technical implementation through testing, deployment, and production support.
- Build Java, JavaScript, and SQL-based enhancements for workplace, manufacturing, and logistics facility workflows, including space planning, move management, maintenance requests, and energy sustainability.
- Develop backend automation, reporting logic, data validation, and client-specific database customizations while maintaining security and reliability standards.
- Partner with business analysts, senior developers, and stakeholders to convert operational requirements into maintainable production software.

Segalo Media

May 2022 - August 2022

Marketing / Analytics Intern

Chicago, IL

- Implemented an automated Python web scraping tool to collect, process, and structure marketing data for analysis.
- Constructed data pipelines and dashboards to deliver actionable insights for campaign and business decision-making.
- Collaborated on projects requiring rapid development, data quality control, and reliable reporting.

Future Founders, Inc.

June 2020 - August 2020

Entrepreneur Intern

Chicago, IL

- Collaborated with a cross-functional team to design and pitch a sustainable food sourcing software platform within a multi-week startup competition.
- Helped lead product strategy, software concept development, and investor-facing presentation efforts, earning second place and prize funding.

RECENT PROJECTS

Slush Financial Mobile App

September 2023 – February 2026

Co-Founder/CTO

Chicago, IL

- Architected and built a full-stack financial app that streamlines expense splitting by allowing users to input amounts, scan receipts, and share QR codes or links for claimable web payments.
- Built mobile, web, and backend functionality using React Native, Next.js, Python/FastAPI, PostgreSQL, and cloud deployment tools.
- Integrated OCR and generative AI workflows to enhance receipt parsing, lender analytics, payment tracking, and user recommendations.

Federated Learning Demo

October 2024 – February 2025

Solo Project

Chicago, IL

- Designed and implemented a federated learning demo that allows users with no prior background to train a CNN model on MNIST data from multiple clients—all while ensuring data security and privacy.
- Built the project for non-technical users, simplifying distributed training, data privacy, and model aggregation concepts.

EDUCATION

University of Illinois at Urbana-Champaign

May 2024

Bachelor of Arts in Economics, Minor in Computer Science
